

Software Development Team Contract

Name: ByteBrush

Members:

Zayam Khan, Derrin Manoj, Myron Lobo, Farid Jamshid, Nathan Tandory

Roles:

- **Project Manager:** Zayam Khan
- **Technical Manager:** Myron Lobo
- **Front-End Lead:** *Derrin Manoj*
- **Back-End Lead:** *Nathan Tandory*
- **Software Quality Lead:** *Farid Jamshid*
- **Developers:** All members

Pipeline:

- **Primary Language:** Python
 - **Repository:** GitHub
 - **Version Control:** GitHub
 - **Project Planning Board:** GitHub Boards
 - **Database Technology:** CSV files (or as determined by project requirements)
-

Articles of Agreement

Communication

1. A Discord workspace will be created for the group to facilitate collaboration and communication.
2. A dedicated channel will be used for daily reports. Each team member must post their updates no later than **every Saturday** in this channel.
3. All group members are expected to respond to messages (direct or group) within **24 hours** of being sent.

Group Meetings

1. The group will meet **online via Discord weekly**, during scheduled lab sessions, to work on the specific assignment from the lab. Members are expected to arrive **fully prepared** for each lab session with any necessary pre-work completed.

2. Outside of scheduled lab meetings, the group will meet **online on Discord at least once per week** with all members present. These meetings will be scheduled at least a **week in advance** to ensure availability.
3. Additional virtual meetings will be held at least once per week between members working collaboratively on specific aspects of the project to ensure consistency between elements.

Work Methods

1. The team will collaborate as a whole during scheduled meetings to ensure effective communication for project-wide decisions.
2. Pair-programming will be the preferred method for coding outside of group meetings, where one member codes and another observes, provides feedback, and helps guide the project session.
 - Pair programming can be done either remotely or in person, as agreed upon by the members involved.
3. Code reviews must be completed by a team member who did not directly contribute to the development. **No code will be committed to the main branch without a completed code review.**

Additional Items

1. All decisions about the project's direction will be made as a team, in consultation with the customer.
2. The team agrees to hold one another accountable. Reminders to complete tasks will not be taken personally but seen as a part of teamwork.
3. Deadlines must be respected. If a team member is falling behind, they are expected to ask for help from others. Similarly, members will offer assistance to others when needed.
4. Members agree to have a positive and collaborative attitude. **Let's have fun and create an outstanding software system!**

Acknowledgment

We, the undersigned, accept the terms outlined above and commit to working together as a team to complete and deliver the project successfully.
